# Download the images from www.kaggle.com

> You need to go to **www.kaggle.com** with your internet browser and create an account with proper username and password to log in

> You have to follow the instructions there to get approval to download the **train.zip** and **test1.zip** archives, respectively of 543MB and 271 MB. Note that the procedure requires receiving some codes confirmation first by email and second by your mobile phone via SMS.

> I downloaded only **train.zip**, as **test1.zip** does not have any label

Dogs vs. Cats

Create an algorithm to distinguish dogs from cats

215 teams · 5 years ago

Overview   Data   Kernels   Discussion   Leaderboard   Rules   Team

Data Description

The training archive contains 25,000 images of dogs and cats. Train your algorithm on these files and predict the labels for test1.zip (1 = dog, 0 = cat).

A note on hand labeling

Per the rules and spirit of this contest, please do not manually label your submissions. We work hard to fair and fun contests, and ask for the same respect in return.
